Summary

Transitioning into full-stack development from a background in cybersecurity and sales engineering, I bring robust skills in JavaScript (including React), Python, and cloud technologies (AWS, Azure). My hands-on experience includes developing secure, scalable applications and automating processes. Certified in Microsoft Azure and AWS, I am ready to leverage my coding expertise and comprehensive security knowledge in a dynamic full stack developer role.

Technical Skills

Languages & Tools: JavaScript (Node.js), Python, Windows Powershell, AWS, Git, Linux CLI, AWS CLI, Docker, MySQL, HTML, CSS, Material UI (MUI)

Software Development Projects

Bounty Board | Software Developer   Dec 2023 - Present
- Developed a secure, full stack, multiplayer mobile game for iOS and Android, facilitating real-time interactions for up to 6 players. Leverages React Native (Expo) for the frontend, Express & Nginx for configuring RESTful API and WebSockets connection, and MySQL & JWTs for authentication and authorization.

Professional Experience

Tabletop Game Project (Unannounced) | Co-Developer   May 2023 - Dec 2023
- Collaborated closely with a small team to design and develop a tabletop game, leveraging skills in narrative design, game mechanics, and project management. Played a key role in shaping the game's conceptual foundation, contributing to both creative and strategic aspects of development.

TriumphPay | Cybersecurity Engineer   Mar 2023 - May 2023
- Led the enhancement of network security through strategic firewall rule adjustments and the deployment of a comprehensive NAC system.

TriumphPay | Sales Engineer   Jan 2023 - Mar 2023
- Automated RESTful API integrations for client demos via PowerShell scripts, significantly reducing manual workload.

GRIN Inc. | Solutions Engineer   July 2022 - Dec 2022
- Assisted Account Executives in closing deals with average size of $33k
- Led technical discussions on GRIN integrations with Content Management Systems like Shopify

Trend Micro | Sales Engineer   Dec 2021 - July 2022
- Conducted hundreds of technical outreach meetings with enterprise prospect customers
- Developed and presented AWS security demonstrations for seven independent cloud services

Trend Micro | Technical Rotation Associate   Dec 2020 - Dec 2021
- Automated cloud migration processes and compliance checks using Python scripts and REST APIs for dozens of clients.
- Supported on-premise and cloud-based products by troubleshooting and resolving customer issues for accounts valued at $100k+
- Assisted Trend Micro clients with health checks, documentation, and support requests

Trend Micro | Cyber Security Intern   Oct 2020 - Dec 2020

- Participated in extensive training on AWS, Azure, Linux, and Trend Micro solutions

Education

Galvanize | Hack Reactor Software Engineering Immersive Program   Aug 2020

Westminster College | B.A. Philosophy and Religious Studies

Certifications

Microsoft | Microsoft Azure Fundamentals   Dec 2021

Amazon Web Services (AWS) | AWS Certified Solutions Architect -- Associate Dec 2020 - Exp. Dec 2023
